

Figure 1 is a plot showing the location effect (lnM) for two groups of locations. The x-axis is labeled "Location effect (lnM)" and ranges from -4 to 2. The top panel shows a distribution of red points with a mean estimate around -1.5 and a 95% CI around -1.0. The bottom panel shows a distribution of blue points with a mean estimate around -0.5 and a 95% CI around -0.2. Both distributions are centered around a vertical dashed line at 0.

Precision (1/SE)    ○   10   ○   20   ○   30   ○   40
